Welcome Message

Dear colleagues and friends,

It is a great pleasure to welcome you to the **Capodistrian Ionian Cardiovascular Meeting 2026**, taking place in the beautiful island of Corfu.

This scientific meeting was born from the shared vision of the **Vascular Surgery Unit of the University of Ioannina** and the **Department of Vascular Surgery of Ludwig Maximilian University Hospital, Munich**, with a common commitment to education, scientific exchange and the advancement of vascular and endovascular surgery.

Our meeting focuses on **Physician Modified Endografts (PMEGs)**, an innovative and evolving technique that has attracted increasing interest, particularly in the treatment of complex aortic aneurysms. Through lectures, hands-on training, expert discussions and case-based sessions, we aim to explore current applications, practical challenges and future perspectives, while sharing experience from leading centres in Greece and abroad.

The name **Capodistrian Ionian Cardiovascular Meeting** pays tribute to **Ioannis Capodistrias**, the first Governor of the modern Greek state, a European statesman of international stature and a physician educated at the University of Padua. Born in Corfu, Capodistrias was deeply committed to education, knowledge and the advancement of society – values that remain at the heart of this meeting.

We would like to express our sincere appreciation to all the **distinguished faculty and invited speakers** who have joined us and are contributing their expertise, experience and enthusiasm to the scientific programme. We are equally grateful to our **supporters and sponsors**, whose contribution has been essential to the realisation of this meeting.

We hope that the programme will provide a stimulating and constructive forum for scientific discussion, the exchange of ideas and experience, and the development of new collaborations among colleagues from Greece and around the world.

We warmly welcome you to Corfu and wish you a fruitful, inspiring and memorable scientific meeting.
